Majoring in Radio, Television and Film:
UNT’s Department of Radio, Television and Film is considered one of the nation’s best RTVF programs, according to Leonard Mogel’s *This Business of Broadcasting*. The department has state-of-the-art equipment and offers an excellent curriculum and faculty. It also offers the advantage of being located in the nation’s fifth-largest television market, the Dallas- Fort Worth region.

As an RTVF major, you will take courses dealing with perspectives on film, perspectives on radio and television, and television or film production. You may want to minor in an area that relates to your career goals, such as art or photography, business or management, education, journalism, social science or theatre arts.
By participating in the student chapters of the many professional broadcasting organizations on campus, you will have a chance to learn about the industry and to meet those already in the business. These organizations include the Broadcast Education Association, the Texas Association of Broadcasters, the International Television Association and the University Film and Video Association.

RTVF faculty members include internationally recognized scholars, seasoned media professionals and award-winning documentary filmmakers. Books written by RTVF faculty members are used in university courses throughout the world, and faculty-produced films and television programs have been seen on network television and screened at New York’s Museum of Modern Art. Faculty members also work for national and international organizations dealing with media education and film preservation.

**Career Potential:**

If you are interested in learning to be a filmmaker, getting a career in broadcasting, producing documentaries or narrative films, or preparing for graduate work in mass communication, then radio, television and film is the major for you.

The RTVF major at the University of North Texas will provide you with a broad liberal arts education while preparing you for a career in broadcasting, corporate video, cable television, educational media, film or advanced study in television and film.

UNT’s Career Center can help you prepare to pursue your career. The center has information about jobs and employers, and the staff can help you with resume and letter writing, job search strategies and interview preparation.
