How To Add An Observation

3 Identify what you see. You have the option to view suggestions to identify your observation to a level you feel confident about.

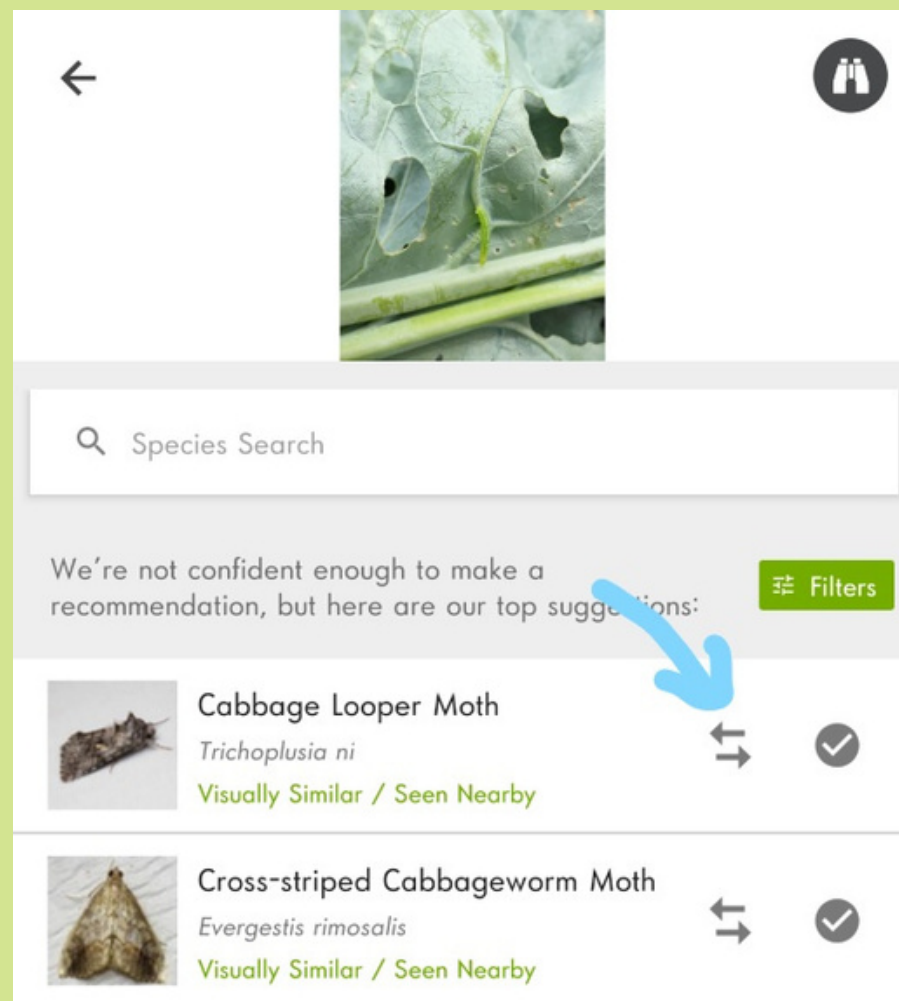

← Edit Observation ⋮

✅ 1st

What did you see?
View Suggestions

ⓘ Name what you saw if you can, even if that's just "insect" or "bird," or just leave this blank. Others may help you identify it!

GOT IT!

TIPS
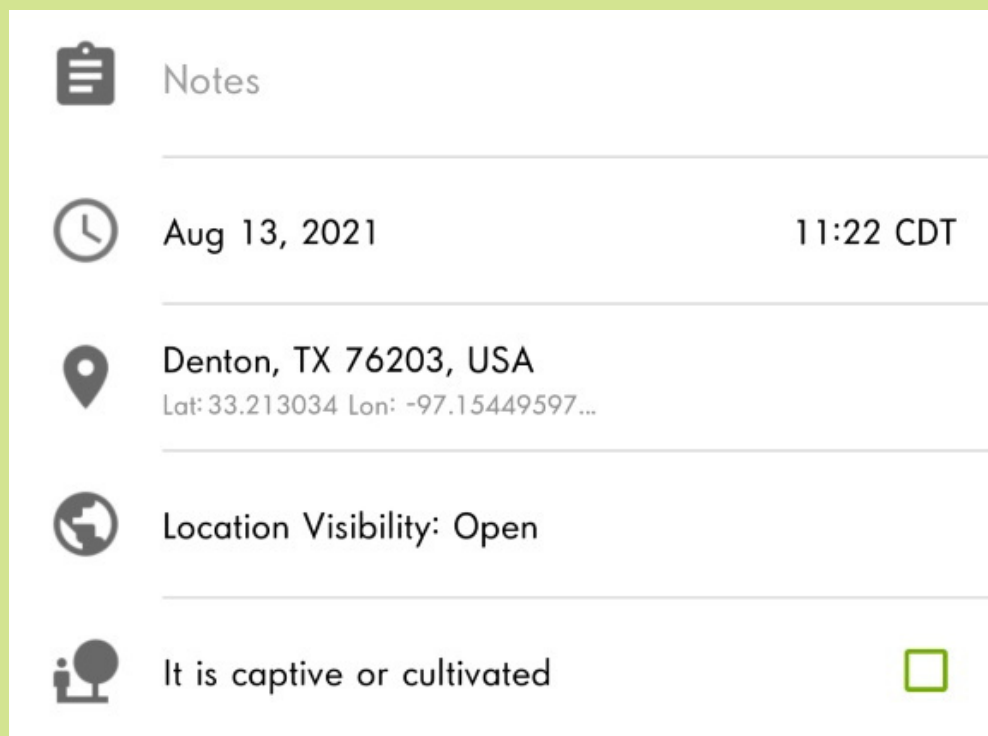

You can also use the compare function to assist you in correctly identifying the species of your observation!

Q Species Search

We're not confident enough to make a recommendation, but here are our top suggestions:

Filters

Cabbage Looper Moth
Trichoplusia ni
Visually Similar / Seen Nearby

Cross-striped Cabbageworm Moth
Evergestis rimosalis
Visually Similar / Seen Nearby

How To Add An Observation

4 Before submitting your observation, add details so the data you submit is complete.

You can add notes, verify the date, select a location, and list if it is captive or cultivated.

📋	Notes	
🕐	Aug 13, 2021	11:22 CDT
📍	Denton, TX 76203, USA Lat: 33.213034 Lon: -97.15449597...	
🌐	Location Visibility: Open	
🧑‍🌾	It is captive or cultivated	☐

How To Add a Location

Make sure you add a location to your observation. If in the garden, search for and select 'UNT Community Garden.'

Captive/Cultivated?

The iNat app is used to collect data about *wildlife*. This app is <u>not</u> used to document captive animals or cultivated plants intentionally grown by humans. If you document a species that is not naturally occurring, make sure to select 'captive/cultivated' on the observation details.
