No-Sew Reusable T-Shirt Bag

Supplies needed:

- T-shirt
- Scissors
- Marker*
- Ruler*

*optional

Step 1: Fold your shirt in half. Make sure to line everything up as nicely as you can.

Step 2: Cut away the sleeves of the shirt. This will become part of your bag handle.

Step 3: Cut a semicircle out of the neck of the shirt. This will be the opening of your bag. You can make this as shallow or as deep as you prefer.
Step 4: Cut ½ inch vertical strips at the bottom of your shirt about 4-6 inches long. If you want your bag to be short you will need to trim off some of the bottom of your shirt before cutting your strips.

Step 5: Unfold your shirt and straighten it out. You will tie off your strips by matching the top strip to the bottom strip and tie it off in a single knot. Repeat this step all the way down the entire shirt."If you want to hide the strips you will need to turn the shirt inside out before tying them. If you want to have a fringe then do not turn the shirt inside out.

Step 6: Take one strip from the first tied off section and a strip from the next tied section and tie them off together in a double knot. You will repeat this step down the entire length of your shirt. This will lock in all of your knots and also close any gaps that you have from step 5.

Enjoy your no sew reusable t-shirt bag!
