Facilities
Mike Flores provided a presentation giving details on the Union roof replacement project. The project will take approximately two weeks starting after the commencement weekend in May. Sidewalks on the north side of the building will be impacted. The new roof is expected to last 20 to 25 years. Removing the solar panels and lightning protection added to the cost of the repairs. The project is estimated at $157,304.40 which includes a buffer.

Mike also provided information on the new boiler that was purchased to replace one that failed. The cost is $63,000 with a 15% contingency. There will be no re-work on the foundation, just the gas lines. There will be additional piping done to include future replacements.

The next updated from Mike was the 221 Project. This is the renovation of Union room 221 to accommodate the University Programming & Arts department. The high cost of the project is mainly due to the build out for the previous tenant, the cost will be approximately $249,000.00.

Mike provided an update on the elevator repairs. The public elevator on the west side of the Union has been down for 45 days because of the belts. New belts have been ordered and received and are to be installed on April 19th which means access to the patio and suite 406 will be closed. Mike will discuss having backup parts on hand with the vendor. The cost of the replacement belts was covered under the UNT Service contract and amounted to $54,026.00.
